

Conventional and Emerging Technologies:

Where Rwanda wants to be

By: James Gashumba

1. Rwanda's demographics show that about 60% of the population is younger people below 35 years of age.
2. The government has, therefore, invested heavily in ICT education and ICT technology infrastructure.
3. By 2010, the country had laid an optical fiber network covering all 30 districts in the country. Fast internet (4G) is widely available now.

Conventional and Emerging Technologies:

Where Rwanda wants to be

4. **Kigali Innovation City** - An ICT ecosystem in Kigali is engendering transformation which is gaining momentum.
5. **Trasform Africa Summit** - inaugural meeting in Kigali in 2013. In its manifesto the signed African nations would put ICT at the centre of their development agenda. **Smart Africa** has since then evolved.
6. Rwanda TVET sector transitioning to Competency-based Teaching and Assessment (CBT/CBA) system.

Conventional and Emerging Technologies: Where Rwanda wants to be

7. Training of Trainers (ToT) program – Rwanda TVET
Trainer Institute will be inaugurated on 26-04-
2018

THANK YOU
